Great Lakes IEMR students Win Youth Green Entrepreneurial Award'12 at 6th Renewable Energy India 2012 Expo (REI)

The 6th Renewable Energy EXPO 2012 in association with MNRE and Ministry of Power invited Indian youth to showcase innovative and scalable alternative energy projects to the international industry congregation present during the expo.

Total 7 teams were selected to showcase and present their idea and product. Great lakes IEMR, Gurgaon's Team Enerture (Bhairaw, Poonam, Nikhil & Ateet) emerged as winner of "**Youth Entrepreneurial Green Award 2012**".

Enerture Team designed "Solar Hydrogen Hybrid System" –**Akshay Urja**, which will provide the society grid-independent energy, reducing carbon-dioxide emissions, offering a clean environmental solution with flexibility and economic advantage. This is complete Green System, which can cater to all the energy requirements using a Hybrid System for our homes. It provide electricity 24X7 for our entire house and also generated hydrogen from this system can be used as car fuel and cooking gas.
