Secondly, relationships are very important for success. The family comes first, be connected and take care of each other in ups and downs. Organisations must build strong relationships with all the stakeholders on the basis of trust and values. Thirdly, people, team work is very important and to work with people be a good listener from other person's perspective. Customer satisfaction is linked with employee satisfaction, so motivating employees positively will impact the bottom line. He further added that the most difficult thing to do as an entrepreneur is to sell a dream to the first few people that join your team. He concluded his speech advising the students to not look at a job as a job but as an opportunity to build certain skills.
