Great Lakes Inks Pact for Research

Great Lakes Institute of Management has signed an MoU with the School of Business and Management affiliated to Hong Kong University of Science and Technology (HKUST). The MoU is to institute academic exchange between Great Lakes and the HKUST Business School. Through this programme, both institutes will be able to exchange faculty, management students and research scholars. The agreement facilitates joint research that could lead to a PhD besides organising international conferences jointly. Another area of mutual interest envisaged would be internship and placement opportunities for Great Lakes students in Hong Kong and vice versa.
